

Data Processing Addendum (DPA)

Scope

This DPA applies where customer data includes personal data and GRIT acts as processor/service provider.

Roles

Customer = controller/business

GRIT = processor/service provider

Processing Purpose

To host, operate, support, secure, and improve the Services.

Security Measures

Reasonable safeguards including access controls, encryption where appropriate, vendor controls, and incident response procedures.

Subprocessors / Service Providers

GRIT may use subprocessors or service providers to operate the Services, including:

- Supabase
- Vercel
- Stripe (payment processing / billing)
- OpenAI
- Google
- Microsoft

Payment card processing is handled by Stripe rather than directly by GRIT.

Deletion

Upon termination, data may be deleted per retention schedule unless law requires retention.

Assistance

GRIT will provide commercially reasonable assistance with lawful privacy requests.
